Avance™ Warewashing Solutions

Solid Machine Detergent

- Effective and efficiently removes even the most difficult food and protein soils
- Minimized spill potential
- Effective at all temperatures to minimize energy costs
- Easy to handle

Avance™ Solid Machine Detergent removes difficult food soils. Product use level is minimized without sacrificing results. Able to handle high protein soils like dried egg yolk and baked-on cheese. Avance™ Solid Machine Detergent is a solid non-chlorinated product minimizing the potential for spills of concentrated dish detergent. Avance™ Solid Machine Detergent is effective in both low and high temperature dish machines.

Avance™ Warewashing Solutions

Solid Machine Detergent

directions

Avance™ Solid Machine Detergent is designed to be dispensed with equipment installed and / or approved by your State Cleaning Solutions representative. Good product performance is dependent on many operational factors such as soil load, water temperature, wash procedures, injection nozzles and mechanical action in the machine. Your service representative will evaluate your soil load and warewashing machine to determine the correct product dosage for your system that will optimize product performance.

Avance™ Solid Machine Detergent is automatically metered into the dish machine at a rate of 2.2-6.4 grams per gallon of wash water.

Please review label and MSDS for all product directions, precautions and first aid information.

technical data

Appearance: White solid
pH (1% solution): 12.5
Density: 14 lbs/gal
