Care For Work Environments[®]

ELC-PS

Electrical Contact Cleaner - Plastic Safe

PRODUCT OVERVIEW :

SAFE ON PLASTICS

ELC-PS is a high-performance blend of fast drying, nonconductive solvents that are safe for use on plastics, rubber, and metal. It contains no CFCs or HCFCs and is ozone safe, making it an environmentally responsible choice for precision cleaning.

EXCELLENT CLEANING POWER

ELC-PS works quickly to remove oil, grease, dirt, and grime from delicate electronic components. Ideal for use on circuit boards, computers, magnetic tapes, printed circuits, gauges, switches, relays, and more. Perfect for a wide range of environments including offices, industrial plants, machine shops, schools, and hospitals.

PREVENTIVE MAINTENANCE SOLUTION

Regular use of ELC-PS helps extend the life of electrical components by reducing the buildup of corrosion and carbon deposits that can impair performance. Keep your equipment running efficiently and reliably with ELC-PS.

DIRECTIONS FOR USE :

Do not use on energized electrical equipment. Allow product to dry and fumes to be completely evacuated before equipment is re-energized. Spray ELC-PS liberally onto contact surface from about 12 inches away. Use the convenient extension tube for pinpoint spray application. In case of corroded surfaces or heavy carbon deposits, it is recommended to use a brush. Spray enough ELC-PS to allow dirt accumulations to rinse off before reactivating system.

TECHNICAL DATA :

FORM: mild solvent aerosol

COLOR: clear water white

SOLUBILITY IN WATER: non-soluble

COLD STABILITY: 0°F

EVAPORATION RATE: fast

STORAGE STABILITY: 1 year

* Extremely flammable and must only be used on equipment that has been de-energized.

Please review label and SDS for all product directions, precautions and first aid information prior to using this product.

PACKAGING

121702-12	11 oz Aerosol/CS12
121702-24	11 oz Aerosol/CS24
