POND RESTORATION PROGRAM

State Industrial Products' Pond Restoration Program is a comprehensive, biological solution designed to revitalize aquatic ecosystems, restoring their health, functionality, and natural appeal. By addressing challenges such as water quality, muck layer buildup, organic buildup, insect nuisances, and malodors, this program ensures a balanced and sustainable environment for aquatic life and surrounding wildlife. When used as instructed, this program is safe for aquatic life. State offers tailored solutions to satisfy customers by keeping your ponds visually appealing.

CORE AQUA JOLT PROGRAM

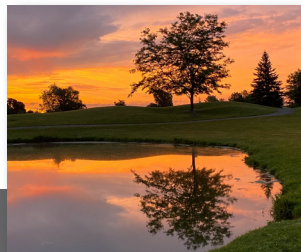

Aqua Jolt Pond Restorer and **Aqua Jolt Sludge Reduction Booster** form the base on which every Pond Program is built. A Pond Treatment Program by State Industrial Products includes both a Starter Treatment to remedy current issues and Ongoing Treatment to maintain water quality and prevent issues from reemerging.

STARTER TREATMENT

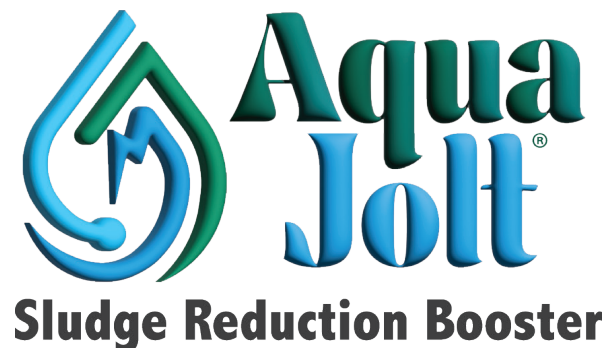

State Industrial Products Pond Treatment Program is biological based, which means our products use beneficial bacteria to make ponds look their best. Before a pond can begin to be treated on a monthly basis, our State Sales Professional must first lay a base for the Ongoing Treatments to build on. This base is formed by heavy applications of Aqua Jolt Pond Restorer and Aqua Jolt Sludge Reduction Booster over the first two weeks of treatment. This loads the amount of biologicals necessary for the good bacteria in our products to multiply and grow.

ONGOING TREATMENT (FLAT-FEE PROGRAM)

After a bacteria colony is established by the Starter Treatment, the monthly Ongoing Treatments can begin. Our State Sales Professional will stop by your location once a month to check on the progress of the pond, free of charge. These monthly treatments give the bacteria the fuel they need to keep working to make sure your pond is healthy and looking its best.

PRODUCT SELECTION

Aqua Jolt® Pond Restorer and Aqua Jolt® Sludge Reduction Booster are the ultimate biological treatment solutions for maintaining a clean and healthy aquatic environment. Aqua Jolt Pond Restorer is formulated to target and reduce bottom sludge and organic buildup. Aqua Jolt Sludge Reduction Booster optimizes the function of the beneficial bacteria found in Aqua Jolt Pond Restorer. These two products combined form the core of State's Pond program.

- Removes bottom sludge and organic waste
- Eliminates the high cost of dredging
- Aids in pond clarity

Aqua Jolt® Pond Restorer

129330 1 GL Bottle
129331 1 GL Bottle/CS4

Aqua Jolt® Sludge Reduction Booster

129332 1 GL Bottle
129333 1 GL Bottle/CS4

PRODUCT SELECTION

Aqua Jolt® Bio-Enzyme packets accelerate the breakdown of organic debris and sediment from fallen leaves, twigs, and organic waste found in ponds. Self-dissolving packs make for easy distribution over lagoons and ponds.

- Helps reduce sludge depth
- Breaks down organic debris
- Easy to use; convenient, water-soluble packets

Aqua Jolt® Bio-Enzyme Packets

123180 25 LB Pail

Aqua Jolt® Light Reducing Blue Dye is a powerful tool for enhancing the health and appearance of your pond or water feature. This specially formulated dye reduces sunlight penetration, helping to limit unwanted plant growth on the bottom of the pond. When used as directed, Aqua Jolt Light Reducing Blue Dye provides an eco-friendly solution that improves water aesthetics and quality while also being safe for aquatic life, birds, and other wildlife.

- Reduces UV rays to limit photosynthetic plant growth
- Enhances visual appeal
- Safe for aquatic life

Aqua Jolt® Light Reducing Blue Dye

129334 1 GL Bottle

129335 1 GL Bottle/CS4

PRODUCT SELECTION

Phosphorus Control Pellets

High levels of phosphorus in ponds can have a negative impact on the performance of our Aqua Jolt biologicals. Aqua Jolt® Phosphorus Control from State Industrial Products is an advanced solution designed to tackle excess phosphorus levels in ponds and water bodies. By effectively binding to phosphorus, this product helps to restore water clarity and balance.

- Helps in removal of phosphates
- Provides oxygen and promotes movement of microbes
- Aids in pond clarification
- Aids in muck and ammonia reduction

Aqua Jolt® Phosphorus Control

129336 20 LB pail

Aquatic Insect Control

Aqua Jolt® Aquatic Insect Control is a highly effective larvicide designed to combat a variety of pests, including mosquitoes, blackflies, nuisance flies, and aquatic midges.

- Kills mosquitos, blackflies, nuisance flies, and aquatic midges
- Easy application that lasts up to 14 days
- Use proper PPE when applying

Aqua Jolt® Aquatic Insect Control

129338 1 GL Bottle

129339 1 GL Bottle/CS4
