

INDUSTRIAL LUBRICANTS *Solutions*

TEF

DRY LUBRICANT & RELEASE AGENT

- Dry lubricant, contains Teflon®
- Resists heat, cold and harsh chemicals
- Clean, clear, low odor

TEF

DRY LUBRICANT & RELEASE AGENT

PROTECTIVE LUBRICANT

TEF's smooth, slippery surface solves the stickiest friction problems. It provides superior, invisible lubrication with excellent release agent properties. TEF eases wear and tear and protects against corrosion, grime and metal-to-metal contact. TEF extends the life of moving parts, reduces downtime and lowers maintenance costs.

MULTI-PURPOSE

Use TEF to free sliding surfaces of all kinds—metals, rubber, wood, leather, glass and paper. TEF dries to a clean, clear, odorless film. It's nonstaining and noncorrosive too, so water can't penetrate or create rust. Dirt and dust can't stick to TEF, and oil can't adhere or penetrate.

RESISTS HEAT, COLD AND CHEMICALS

Effectively lubricates and protects from -100°F to 500°F. TEF is resistant to acids and chemical solvents, and is essentially insoluble in organic solvents. The formula will not combine or react with surface.

DIRECTIONS FOR USE

Shake for 1 full minute before using. Hold container 5 to 12 inches from surface to be sprayed. Apply only a thin film. Apply to a clean surface. Dries instantly. No baking or heating is necessary. Can be readily removed with toluene, xylene, or acetone.

NOTE: Prior testing is recommended for applications involving plastics, paints and polymeric fibers.

Please review label and SDS for all product directions, precautions and first aid information.

TECHNICAL DATA

APPEARANCE: hazy white spray

ODOR: Mild Petroleum

SPECIFIC GRAVITY: 0.725

COLD STABILITY: 0°F

USEFUL TEMPERATURE RANGE OF DRY LUBRICANT: -100°F to 500°F

STABILITY: one year

PACKAGING

121830-12 13 OZ Aerosol/CS12

105466 13 OZ Aerosol/CS24
