BC-1

Brake Parts Cleaner

FAST, EFFECTIVE STAIN REMOVAL

BC-1 Brake Parts Cleaner is a highly-concentrated solvent blend that provides maximum performance without the use of ozone depleters or chlorinated solvents.

When used with State's pressurized sprayers, the powerful blasting spray easily removes brake fluid, grease, oily dirt and contaminants from linings, pads, rotors, drums, cylinders and springs without disassembling the unit. The fast-evaporating formula won't leave residues or interfere with brake operations. It stops disc brake squeaks in their tracks.

USE WHENEVER REPLACING OR INSPECTING:

Brakes	Linings	Wheel cylinders
Brake discs	Pads & Rotors	Master cylinders
Brake drums	Return springs	Other brake parts
Backing plates	Adjusters	

DIRECTIONS FOR USE (Aerosol):

The can should be at room temperature (70°F) before using. Be sure the arrow on the spray head is pointed toward the area going to be sprayed. Spray BC-1 generously on all brake parts. Use enough to allow the pressure and solvent action to work on contaminants. Air dry or wipe dry with a soft cloth. Repeat application if necessary to remove extremely heavy deposits.

DIRECTIONS FOR USE (Bulk):

For use in a sprayer: Spray parts liberally and allow to run off. Air or towel dry with a clean, soft wiper. Repeat as necessary. Protect rubber and plastic parts from spray.

Important: Do not spray on hot or warm surfaces.

For use in immersion tanks: Fill tank to appropriate level. Remove excess dirt and debris from part with a brush. Immerse part in tank and allow spray to wash over vigorously. Remove part and allow to air dry or blow dry with compressed air. Change solvent out when fill level is low.

TECHNICAL INFORMATION

BULK

APPEARANCE: clear liquid with a solvent odor.

EXTREMELY FLAMMABLE: Keep away from heat, sparks and open flames.

VOC CONTENT: 20%
