

Chlorine Sanitizer

- EPA registered sanitizer for dish machine use
- EPA Registration Number 1672-65-84423
- Concentrated and stabilized to minimize gassing
- Effective in all low temperature machines
- Meets all Health Department Standards

Avance[™] Chlorine Sanitizer is a liquid, EPA registered sanitizer specifically formulated for use in low temperature dishwashing machines. Because Avance[™] Chlorine Sanitizer is EPA registered, you can be confident that you are meeting Health Department standards. Avance[™] Chlorine Sanitizer is 6% active sodium hypochlorite.

Avance[™] Chlorine Sanitizer can also be used for these applications:

- Sanitizing food contact surfaces
- Deodorizing garbage cans
- Sanitizing nonporous food contact surfaces
- Sanitizing eating and drinking utensils
- Laundry sanitizing
- Food egg sanitizing
- Fruit and vegetable washing

Chlorine Sanitizer

directions

Avance™ Chlorinated Sanitizer is designed to be dispensed with equipment installed and/or approved by your State Cleaning Solutions representative. Good product performance is dependent on many operational factors such as soil load, water temperature, wash procedures, injection nozzles and mechanical action in the machine. Your service representative will evaluate your soil load and warewashing machine to determine the correct product dosage for your system that will optimize product performance.

For Sanitizing in Low Temperature Dishwashing Machine:

Dispense Avance™ Chlorine Sanitizer into the final rinse water at 100 ppm available chlorine. Do not allow concentration to fall below 50 ppm. Air dry. Only a qualified service representative should set or adjust dispenser in the machine.

For specific use directions in other applications please see the product label.

DO NOT MIX WITH AMMONIA - DO NOT MIX WITH ACIDS.

Please review label and MSDS for all product directions, precautions and first aid information.
