LIQUID METAL SAFE MACHINE DETERGENT

Avance[™] Liquid Metal Safe Detergent is a low foaming machine detergent designed for commercial dish machine. The concentrated formulation washes away heavy soils, yet is safe for use on soft metals such as aluminum, copper and silver.

Conventional dish machine detergents contain harsh caustics and sometimes chlorine bleach, which attack soft metals. Aluminum can turn dark, etch and pit when used with conventional machine detergents. Often, these items have to be washed by hand in the three compartment sink wasting valuable labor hours. Avance Liquid Metal Safe Detergent can be used to clean all types of dishes, trays, pots and pans yielding sparkling results. This product uniquely can also be used on soft metals such as those found in baking sheet pans and cookware.

DIRECTIONS FOR USE:

This product is designed to be dispensed with equipment installed and/or approved by your State Cleaning Solutions Service Representative. Consult your representative for information on equipment setup, usage level and usage level.

TECHNICAL DATA:

Appearance: Clear Red Liquid

Odor: No fragrance added

Weight: 10.3 lbs/gal

pH (concentrate): > 13.0

Freeze/Thaw: Stable
