

Rinse Additive

- Effective at low use rates
- Provides water sheeting to prevent hard water spots and films
- Eliminates streaking
- Effective in both low and high temperature machines
- Delight your customers with sparkling glassware and bright cutlery

Avance[™] Rinse Additive effectively sheets water to speed dry time and prevent water spotting. Avance[™] Rinse Additive is compatible with all State Cleaning Solutions detergent and sanitizing products. Avance[™] Rinse Additive is formulated to eliminate foaming issues and speed dish machine processing time.

Rinse Additive

directions

Avance™ Concentrated Rinse Additive is designed to be dispensed with equipment installed and/or approved by your State Cleaning Solutions representative. Good product performance is dependent on many operational factors such as soil load, soil type, water temperature, wash procedures, injection nozzles and mechanical action in the machine. Your service representative will evaluate your soil load and warewashing machine to determine the correct product dosage for your system that will optimize product performance.

Only a qualified service representative should set or adjust dispensing volumes.

Typically, Avance™ Rinse Additive is automatically metered into the machine at a rate of 1.5 - 4 milliliters per rack.

Please review label and MSDS for all product directions, precautions and first aid information.
