- Tables
- General deodorizing of surfaces

# Sani Quat

## directions

Avance™ Sani Quat is designed to be dispensed with equipment installed and / or approved by your State Cleaning Solutions representative. Good product performance is dependent on many operational factors such as soil load, water temperature, wash procedures, injection nozzles and mechanical action in the machine. Your service representative will evaluate your soil load and warewashing machine to determine the correct product dosage for your system that will optimize product performance.

Only a qualified service representative should set or adjust dispenser dishwashing machine.

For sanitizing food contact surfaces in public eating places, dairy processing equipment and food processing equipment, utensils:

1. Scrape, flush or presoak articles (whether mobile or stationary) to remove gross food particles and soil.
2. Thoroughly wash articles with State Cleaning Solutions detergent.
3. Rinse articles thoroughly with potable water.
4. Sanitize articles using a solution of 1/4 ounce of Avance™ Sani Quat per gallon of water (200 ppm active). Articles that can be immersed in solution must remain for 60 seconds. Articles too large for immersion should be thoroughly wetted by rinsing, spraying or swabbing.
5. Remove immersed items from solution and make certain all surfaces are adequately drained and air dried. No potable rinse allowed. Thoroughly drain non-immersed items and air dry.

For specific use directions in other applications please see the product label.
