

Solid Rinse Additive

- Delight your customers with sparkling glassware and bright cutlery
- Super concentrated solid
- Cost effective results
- Solid formulation minimizes spill potential
- Eliminates streaking and spotting
- Provides water sheeting to speed dry time

Avance[™] Solid Rinse Additive is a concentrated solid formulation that provides high performance at low product dosage. Avance[™] Solid Rinse Additive reduces the potential for chemical spills and wastage. Avance[™] Solid Rinse Additive provides superior water sheeting to prevent water spots, streaking and speed dry time and machine process time. This allows you to operate your low temperature machines at maximum efficiency and return table stock to service quickly.

Solid Rinse Additive

directions

Avance™ Solid Rinse Additive is designed to be dispensed with equipment installed and / or approved by your State Cleaning Solutions representative. Good product performance is dependent on many operational factors such as soil load, water temperature, wash procedures, injection nozzles and mechanical action in the machine. Your service representative will evaluate your soil load and warewashing machine to determine the correct product dosage for your system that will optimize product performance.

Only a qualified service representative should set or adjust dispenser dishwashing machine.

Please review label and MSDS for all product directions, precautions and first aid information.
