# D-STROY®

## Odor Neutralizer & Deodorizer

## PRODUCT OVERVIEW :

### Biological Action Against Malodors and Stains

D-Stroy® uses powerful bacteria to digest and eliminate organic waste. These bacteria produce trillions of enzymes targeted to break down organic matter, such as proteins, carbohydrates, cellulose, fats, oils, and greases—all of which are common components in pet odors, stains, and other waste residue. Even after the initial organics are broken down, the bacteria continue multiplying to eliminate all remaining odorous debris.

Because D-Stroy® is biological, it is safe for use in animal-contact areas. It contains no acids, alkalis, or solvents, and it is non-toxic and non-corrosive. As a result, it effectively solves odor problems without causing any harm to furry friends.

### Neutralizes Odors at the Source

This product also contains State's SE-500®, an ingredient that eliminates odors at the source rather than simply masking them. In addition to breaking down the source of the odor, D-Stroy® guarantees that no malodors remain by neutralizing the malodor particles with a chemical reaction. This means no wet dog smell, no animal dander stench, no reeking of pet food, and no other leftover waste odors.

D-Stroy® comes in four different scents: Original, Apple Orchard®, Morning Fresh™, and Coastal Dreams™. This way, it ensures comprehensive odor control by combatting malodors in three phases: organic breakdown, odor neutralization, and fragancing. Use D-Stroy® at the source of your pet odors and enjoy a fresher, clean-smelling facility.

### Fast-Acting, Effective, and Multi-Functional

The application potential for D-Stroy® is limitless. Simply apply where pet odors persist, and the bacterial breakdown of organics, SE-500® odor neutralization, and pleasant fragancing will begin. This multi-functional product can be applied to a variety of animal-contact spaces, including pet relief areas, animal cages, veterinary exam rooms, animal transport vehicles, carpets, and more.

### Applications

D-Stroy® has many possible applications, but the following are the most common in animal-contact areas:

- Pet relief areas
- Animal cages
- Veterinary exam rooms
- Pet parks
- Animal training facilities
- Grooming salons
- Pet-friendly elevator lobbies and hallways
- Kennel runs
- Dog wash stations
- Pet waste disposal stations
- Animal transport vehicles
- Pet feeding stations
- Animal holding rooms
- Pet play areas
- Carpets
- Pet-contact surfaces

## DIRECTIONS FOR USE :

### ODOR ELIMINATION

Apply undiluted product to odor-causing areas. Use as needed. Not for direct application to pets.

## TECHNICAL DATA :

**APPEARANCE:** milky, emulsified liquid

**AVAILABLE FRAGRANCES:** Original, Morning Fresh™, Apple Orchard®, Coastal Dreams™

**pH:** 7.0-8.5

**TEMPERATURE STABILITY RANGE:** 55°F-100°F for optimum performance

**BACTERIAL COUNT:** 20 billion per quart or 100 billion per gallon

**BACTERIAL PATHWAYS:** aerobic and facultative anaerobic

**STABILITY:** 2 years

### PACKAGING

#### Original

121203	55 GL Drum
121202	20 GL Drum
103665	5 GL Pail
121200	1 GL CS/4
121198	1 QT CS/12

#### Apple Orchard®

121195	20 GL Drum
121194	1 GL CS/4
