

INDUSTRIAL LUBRICANTS *Solutions*

DRY- **LUBE**

DRY MOLY LUBRICANT

- Moly-based dry film lubricant
- Quick drying, non-tacky finish adheres well to most surfaces
- Versatile, withstands high temps and pressures
- Displaces moisture, protects against corrosion

DRY- LUBE

DRY MOLY LUBRICANT

CONVENIENT AEROSOL LUBRICANT

Dry Lube Dry Moly is an easy-to-use molybdenum disulfide dry film lubricant that withstands high pressures and temperatures. Convenient aerosol is ideal for lubricating surfaces where a liquid lubricant is not practical.

VERSATILE

Fast drying with minimal transfer. Protects from rusting and corrosion by displacing moisture. Reduces metal to metal contact on treated surfaces. Service temperatures range from -40°F to 600°F and pressures up to 250,000 psi.

APPLICATIONS

For lubrication of all metal moving parts including high speed gears, machine tools, pump assemblies, conveyors, bearings, wire cable, pipe, engines, heavy equipment, and exposed metal parts. Areas of use include industrial plants, oil rigs, pipe yards, construction areas, machine shops, farm equipment, repair services, office machines, aircraft manufacturers and suppliers, and commercial printers.

TECHNICAL DATA:

Form: solvent based aerosol

Odor: solvent

Color: black

Toxicity: 100 ppm OSHA PEL

Temp Range: -40°F to 600°F

Storage Stability: 1 year

Cold Stability: 0°F

Evaporation Rate: fast
