Extreme

High Solid Coatings

HIGH SOLIDS FORMULATION

Extreme Paints have over 35% solids, which guarantees better coverage, protection and color retention. Combine that with the large can size, and one can of Extreme Paints is equal to four cans of your average spray paint.

SPECIAL PACKAGING

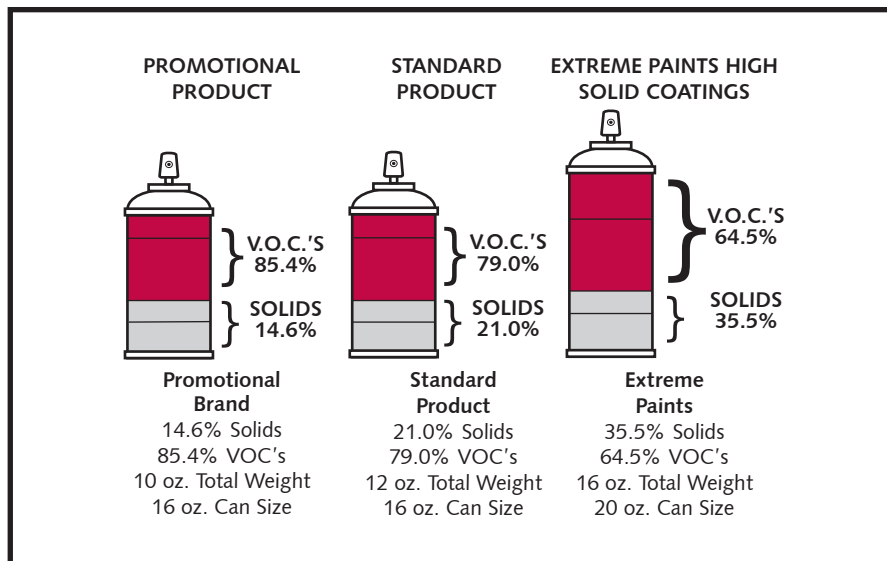

A full-length dip tub reaches the bottom of the can for complete paint usage. And, with a special micron filter and concave disc mixer(not a ball), clogging is virtually eliminated, providing the smoothest delivery system in the market.

LOW SOLVENT FORMULA

Extreme Paints do not contain lead, CFC's, chromates or chlorinated solvents, which meets strict VOC requirements and most stringent air quality requirements.

DIRECTIONS FOR USE:

- Thoroughly clean and dry surface before painting
- Paint in a clean area free from dust or debris
- Shake paint can for one minute, after rattle is heard, to thoroughly combine contents
- Hold can 8-12 inches away from area to be painted
- Before painting object, depress nozzle and spray contents to avoid sputtering and ensure a smooth flow
- Re-shake can intermittently to ensure contents are mixed for uniform coverage
- Let painted area stand uninterrupted until completely dry. Extreme Paints sets up within one hour and are completely dry within 24 hours. Keep in mind that dry times vary depending upon temperature, humidity and amount of paint applied

PACKAGING

16 OZ Aerosol/CS12

125812	■ Beige	105702	■ Gloss Safety Red
105700	■ Dark Gray	125118	■ Gloss Safety Yellow
