Care For Work Environments®

STA-CLEAN®

ANTIMICROBIAL TABLETS

PRODUCT OVERVIEW :

COMPLETE TREATMENT

Sta-Clean® Antimicrobial Tablets are safe, easy-to-use, pre-measured tablet treatments for air conditioner condensate drain pans and lines.

Sta-Clean Antimicrobial will open up clogged condensate drain lines, and also keep these drain lines and pans from plugging up. Use Sta-Clean Antimicrobial to prevent the overflow of condensate pans, thus preventing damage to walls, ceilings, floors, furniture, and carpets.

KILLS AND CONTROLS GROWTHS

Any place that condensate or water is collected becomes a breeding place for a broad spectrum of harmful bacteria. Sta-Clean's powerful formula will eliminate, control, and prevent the growth of foulants and sludge.

ELIMINATES ODORS

Sta-Clean Antimicrobial Tablets not only disperse solids down the drain, but they also eliminate unpleasant water odors. Odors are removed without the use of chlorine or other noxious fumes.

ECONOMICAL

Sta-Clean Antimicrobial Tablets have been engineered to be a cost-cutting, labor-saving treatment. The tablets plates the pan with a micro film for positive, prolonged cleaning action. The residual action keeps pans free of slime and odor for four to six months.

EASY-TO-USE

Sta-Clean Antimicrobial Tablets are simple, premeasured tablets. Just drop into drain pan and Sta Clean Antimicrobial starts working immediately.

VERSATILE

Sta-Clean Antimicrobial Tablets can be used in a wide array of facilities for a number of applications. See product label for full list of applications.

DIRECTIONS FOR USE :

CONDENSATE DRIP PANS Initially, in order to clean out heavy accumulations use at least two Sta-Clean tablets for each 3 tons (36,000 BTU). Thereafter, place one tablet for each 3 tons in the pan each month. Position tablet so that moisture drips on or runs over the tablet for positive, prolonged cleaning action. For larger units, repeat the above dosage including the initial application for each 3 tons.

This product offers a versatile range of applications to meet various needs. For detailed usage instructions and specifications, please refer to the product label.

TECHNICAL DATA :

APPEARANCE: white tablet

ACTIVE INGREDIENT:

n-Alkyl dimethyl benzyl ammonium chlorides.....40%
Inert Ingredients.....60%

EPA REGISTERED: #507-2-70799

Sta Clean Antimicrobial tablets are effective against slime and scum and prevent the odors caused by their accumulation.
