CARE FOR WORK ENVIRONMENTS®

STATE[®] FRAGRANCE FACTORY[®]

State Industrial Products has been a market leader in odor neutralization and air quality enhancement for decades. Our Fragrance Factory is a feed and control system designed for use with the Fragrance Pak™ odor neutralization program.

Made of durable, high impact plastic, it is designed to hold up in even the most rugged environments. It is easy to install, battery powered and offers versatile control features to conserve both power and product usage. The Fragrance Factory attractively fits any décor and operates silently for an invisible, effective odor control program.

FEATURES:

- Vent, located on the front of the unit, releases fragrance into the room
- Rugged cabinet, molded of high-impact plastic is cleanable and durable
- Three-way switch allows unit to be programmed for six different modes (with light sensor)
 - On 1 minute off 5 minutes
 - On 1 minute off 15 minutes
 - On 24 hours
- Light sensor activates motor when room lights are on
- Whisper quiet motor/fan unit
- Wires and control board located out-of-the-way for easy cleaning

FRAGRANCE GEL TECHNOLOGY

Our water-based gel has been developed exclusively for the Fragrance Factory system. The gel fragrance includes an odor-neutralizing ingredient that provides 24-hour air quality enhancement.

SE-500[®] ODOR ELIMINATING TECHNOLOGY

Unlike many spray products that simply mask foul odors, each Fragrance Pak scent contains State's SE-500[®] odor-neutralizing additive to target and eliminate foul odors. SE-500 neutralizes foul odors at the molecular level. Fragrance Paks are strong enough to neutralize malodors caused by smoke but gentle enough not to overwhelm delicate noses.

APPLICATIONS

Fragrance Paks can be used in many different environments: restrooms, offices and conference rooms, lobbies, hallways, common areas, kitchens, hotel rooms, industrial and maintenance areas and disposal areas.

UNIT INSTALLATION

The mounting surface should be clean and free of obtrusive irregularities. Clean surface with enclosed alcohol swab and allow to dry thoroughly. Remove film from adhesive backing. Firmly press the back plate of the unit onto mounting surface in either the vertical or horizontal position. Hold for 30 seconds or more to ensure good adhesion. For better stability of the Fragrance Factory, a mounting screw can be used. Please review label and SDS for all product directions, precautions and first aid information.

DIRECTIONS FOR USE

Open Fragrance Factory dispensing unit. Pull back on tab and remove foil from Fragrance Pak. Insert Pak in the shelf of the Fragrance Factory. For maximum odor control and air freshening, use two opened Fragrance Paks in the unit. Place one on the left and right shelf. Fragrance Pak(s) must be replaced on a monthly basis. Batteries should be replaced every three (3) months.
