CARE FOR WORK ENVIRONMENTS[®]

JONADE[®]

TOILET DEODORIZER AND MAINTAINER

UNBEATABLE VALUE

Jonade is a toilet bowl deodorizer and maintainer that is designed to dissolve uric acid salt, mineral deposits and hard water scale between scrubbing. Its special blend of penetrants and surfactants does not contain paradichlorobenzene and is infused with State's SE-500™ to eliminate malodors on a molecular level each time water passes through it. This unique cleaning formula will continue to work as it flows through the drain pipes.

STATE-OF-THE-ART DESIGN

The compact design of Jonade clips to the side of virtually any toilet bowl. To ensure optimal efficiency and water flow, close attention was paid to the size, number and placement of the drainage ports. This attention to detail allows Jonade to provide long lasting cleaning and deodorizing power.

CUSTOM EXPERIENCE

To help provide a desirable fragrance, State offers Jonade in two pleasant scents: Morning Fresh™ and the original Jonade Blue (berry). Fragrance will only be released when activated with water, making for a more cost efficient option than other units that evaporate over time.

DIRECTIONS FOR USE

1. Simply clip Jonade to the rim of the toilet bowl.
2. Make sure the contour basket fits snugly against the inside of the bowl to ensure sufficient water contact with each flush.
3. After Jonade is used, discard the entire basket and replace with a new one.

NOTE: Store Jonade in a cool, dry place. For best results, clean toilet bowls thoroughly with State Mint Action before using.

TECHNICAL DATA

APPEARANCE: pink or blue solid

ODOR: Morning Fresh™ or Jonade Blue (berry)

FLASH POINT: none to boiling point

LIFE CYCLE: 4 to 6 weeks, depending on water flow

SOLUBILITY: water activated
