

WASTEWATER *Solutions*

State[®] Pit Boss

- Reduces fats, oils and grease (FOG) as well as odors
- Breaks down fatty acids and a wide range of complex organics
- Non-caustic, non-corrosive and non-pathogenic

CARE FOR WORK ENVIRONMENTS[®]

State[®] Pit Boss

CONTINUOUS TREATMENT

In areas where automatic feed equipment can't be used, Pit Boss is the answer. This slow release block, which consists of Bacillus and Pseudomonas bacteria, creates the staying power needed to maintain the treated area. Place Pit Boss upstream to create a "bio-generator" that produces higher bacterial counts in your wastewater stream. Pit Boss will also work quickly to break down sludge, fats, oils and grease.

HOW IT WORKS

Pit Boss reduces sludge buildup while breaking down odors, fecal matter and grease compounds. The combination of bacteria breaks down long-chain fatty acids as well as a wide range of complex organics. Pit Boss dissolves gradually over a 30-day period (depending upon flow rate), allowing for continuous treatment.

DIRECTIONS:

Remove Pit Boss from box. Using a rope, suspend Pit Boss into the area to be treated. Replace every 30 days.

TECHNICAL DATA:

APPEARANCE: green cylindrical block

ODOR: mild, earthy

TEMPERATURE RANGE: 45 - 120°F (7 - 50°C)

pH RANGE: 5.0-9.5

BACTERIA COUNT: minimum aerobic and anaerobic bacteria - 9 billion CFU per 5lb block

TYPES OF BIOLOGICAL ENZYME PRODUCTION:

Alpha-Amylase, Lipase, Protease, Cellulase, Ammonia Assimilation, Reductase, Xylanase and Urease

CATALYZES THE BREAKDOWN OF: proteins, starches, fats, oils and grease

STORAGE CONDITIONS: store in a cool, dry location

Please review label and SDS on stateindustrial.com for all product directions, precautions and first aid information prior to using this product.
