

# WATER TREATMENT *Solutions*

## **RES-CLEAN II** **RESIN CLEANER**

- Lengthens softener resin life
- Restores and maintains full resin capacity
- Reduces salt consumption
- Saves water, salt and resin costs

CARE FOR WORK ENVIRONMENTS®

# RES-CLEAN II

## RESIN CLEANER

### DESCRIPTION

Water softeners are an efficient way to remove potentially damaging hardness (calcium, magnesium) from boiler feed water as well as potable water supplies. Resin fouling, especially with trace amounts of iron, can cause premature resin failure and quickly reduce the hardness-removing capacity of resin.

Res-Clean II contains powerful cleaners and chelants that quickly and reliably clean iron-fouled resin on-line during normal regeneration cycles. A reliable 24/7™ Pump automatically feeds the correct dosage to maintain softener resin "health", keeping it clean and maintaining its full capacity.

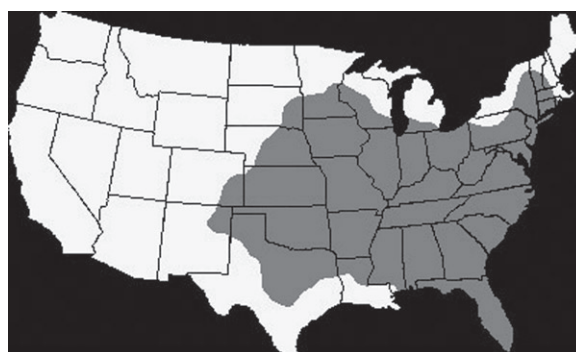

### DIRECTIONS FOR USE

Res-Clean II is best fed automatically once per week directly to the bottom of the brine tank. The feed rate is 16 to 32 ounces per cubic foot of resin. Refer to chart to help determine cubic footage of resin in softener tank.

To automate Res-Clean II feed, State offers a complete package including Res-Clean II and a State 24/7 pump system.

Please review label and SDS for all product directions, precautions and first aid information

Softener Tank Dimensions	Cu./Ft. Resin
9" X 48"	1
10" X 54"	1.5
12" X 52"	2
13" X 54"	2.5
14" X 65"	3
16" X 65"	4
18" X 65"	5
21" X 62"	6
24" X 60"	8
24" X 72"	9
30" X 72"	15
36" X 72"	20
42" X 72"	25
48" X 72"	35
63" X 86"	50

Typical iron in ground water across the USA. Dark grey areas indicate high iron areas.

### PACKAGING

119474	15 GL Drum
123635	5 GL Pail
247RES	Start-Up Package (5 gallon with automated feed pump)
