CARE FOR WORK ENVIRONMENTS®

TC-2000™

BACTERIAL ODOR DESTROYER

BACTERIAL ODOR-CONTROLLING ACTION

TC-2000 contains over 100 billion colony forming units per gallon that digest organic waste and the odors associated with it. Specific strains of bacteria seek out and break down proteins, carbohydrates, cellulose, fat, oil and grease that cause malodor.

ODOR NEUTRALIZER

TC-2000's bacterial controlling action, eliminates the source of the malodor. Many products just mask the smell, allowing the odor to come back as the masking agent dissipates. SE-500®'s patented odor-eliminating technology neutralizes malodors at the molecular level. TC-2000 dispensed through our 24/7™ automated pump, provides 24-hour odor control.

While deactivating odor at its source, TC-2000 refreshes with our Morning Fresh™ fragrance, replacing even the nastiest odors associated with trash chutes, dumpsters or compactors.

STRENGTH WITH SAFETY

Nonflammable TC-2000 is neither an acid, alkali, nor a solvent. It is non-polluting, ecologically beneficial and neutralizes the most putrid odors. Use TC-2000 with confidence; it is nonpoisonous, noncaustic and noncorrosive.

APPLICATION AREAS

- Trash Compactors
- Trash Chutes
- Dumpsters

DIRECTIONS FOR USE:

For Odor Elimination in Trash Chute Areas, Compactors or Dumpsters: Dispense TC-2000, using a 24/7 Feed Pump with a misting tip, at 24 oz. per day. For best results, the 24/7 pump should be set to spray ten seconds per hour. For heavier odors, product may need to be dispensed at a higher dosage rate.

Other Areas: TC-2000 may be used in areas where a 24/7 pump cannot be used. In these cases, mix TC-2000 at 4 ounces per gallon of water and apply through trigger sprayer or compression sprayer.

Please review label and SDS for all product directions, precautions and first aid information.

TECHNICAL DATA

APPEARANCE: milky emulsified liquid

ODOR: Morning Fresh™

WEIGHT PER GALLON: 8.34 pounds

BIODEGRADABLE: contains biodegradable ingredients

pH: 7-8

TEMPERATURE STABILITY RANGE: 45°F-120°F (7°C-49°C) for optimum performance

LIVE BACTERIA PRESENT: yes

BACTERIAL COUNT: 100 billion cfu/gallon

DEODORIZING FUNCTION: removes the organic source of odors

TYPES OF BACTERIA PRESENT: aerobic, anaerobic, facultative

STORAGE CONDITION: Store in a cool place. Keep container closed when not in use.

Stability: minimum one year
