

DISINFECTING HARD, NON-POROUS SURFACES

The World Health Organization recently announced the novel Coronavirus, officially named COVID-19, as a pandemic. To ensure individuals in your facility remain healthy, thoroughly disinfect hard, non-porous surfaces, such as door knobs, hand rails, elevator buttons, light switches and tables, daily in high traffic areas.

Proper disinfection is achieved after following careful cleaning procedures. If surfaces are visibly soiled, State recommends using a detergent and water prior to disinfection. Additionally, any cleaning and disinfection solutions should be mixed fresh daily to avoid contamination or expiration.

Personal protective equipment (PPE) must be worn while disinfecting these areas. This includes gloves and safety glasses.

The following State products can be used for disinfecting hard, non-porous surfaces when following these instructions.

Triple Quick™

- Proper PPE while using Triple Quick is gloves and safety glasses (and respirator if fogging)
- No dilution necessary.
- Hold container six to eight inches from surface to be treated.
- Spray area until it is covered with the solution.
- Allow surface to remain wet for 2 minutes.
- Let air dry.

Quick Defense™ Disinfectant Tabs

- PPE: Gloves, safety glasses.
- Dilute 2 tablets in 1 gallon of water.
- Apply solution with brush, spray device, sponge, cloth, or mop to wet all surfaces thoroughly.
- Allow surface to remain wet for 10 minutes.
- Remove excess product by wiping with brush, sponge, or cloth.
- Do not breathe spray mist.

Quick Defense™ NDC (US Only)

- Proper PPE while using Quick Defense NDC is gloves and safety glasses (and respirator if fogging).
- Dilute 1 ounce per gallon of water.
- Apply solution with a trigger sprayer so as to wet all surfaces thoroughly.
- Allow to remain wet for 5 minutes.
- Remove excess liquid.

NDC™

- Proper PPE while using NDC is gloves and safety glasses (and respirator if fogging).
- Dilute 2 ounces per gallon of water.
- Apply solution with a trigger sprayer so as to wet all surfaces thoroughly.
- Allow to remain wet for 10 minutes.
- Remove excess liquid.

Ecolution® Disinfectant (US Only excluding California)

- Proper PPE while using Ecolution Disinfectant is gloves and safety glasses (and respirator if fogging).
- Dilute 2 ounces per gallon of water.
- Apply solution with a trigger sprayer or other mechanical sprayer devices.
- Treated surfaces must remain wet for 10 minutes.
- Let air dry.

F-362™ No Rinse (California and Canada Only)

- Proper PPE while using F-362 No Rinse is gloves and safety glasses (and respirator if fogging).
- Dilute 2 ounces per gallon of water.
- Apply solution with a trigger sprayer or other mechanical sprayer devices.
- Treated surfaces must remain wet for 10 minutes.
- Let air dry.

Note: Hard surfaces may also be disinfected using a fogging machine. Refer to "Disinfecting Hard and Soft Surfaces Using a Fogging Machine" for more details.
