Care For Work Environments®

Aqua Jolt® AQUATIC WEED KILLER

PRODUCT OVERVIEW :

FAST-ACTING CONTACT PERFORMANCE

Aqua Jolt® Aquatic Weed Killer delivers rapid control of unwanted plant growth by absorbing directly through plant leaves. Once applied, it begins working immediately, disrupting plant growth and producing visible results within days. The formula becomes inactive upon contact with soil, providing effective vegetation control while remaining safe for the surrounding environment when used as directed.

FLEXIBLE APPLICATION ACROSS AQUATIC AND LAND ENVIRONMENTS

The aquatic weed killer is designed for use in both aquatic environments and non-crop land areas where vegetation control is required. It can be used in ponds, lakes, drainage ditches, and other contained water systems to manage algae and aquatic weeds, as well as on land areas such as driveways, patios, walkways, and fence rows. Its concentrated formula allows for flexible dilution rates, providing reliable control across a wide range of vegetation management needs.

DIRECTIONS FOR USE :

Refer to the product label for proper use directions.

Please review label and SDS for all product directions, precautions, and first aid information.

TECHNICAL DATA :

APPEARANCE: yellow liquid

pH: 4-6

STABILITY: 1 year

Please review label and SDS for all product directions, precautions, and first aid information.
