Care For Work Environments®

# CURRENT ISSUE® PARTS WASHER FLUID

## PRODUCT OVERVIEW :

### SAFE & EFFECTIVE CLEANING

Current Issue® Bulk has a dielectric strength of 34,000 volts, along with non-corrosive and non-caustic properties, making it a reliable choice for cleaning and degreasing in industrial environments. It effectively removes grease, grime, and dirt, helping to maintain the integrity of parts.

### VERSATILE PARTS WASHING PERFORMANCE

Formulated for use in parts washing applications and soak tank cleaning, Current Issue® Bulk features a pleasant citrus fragrance for an improved user experience. Its non-emulsifying formula eliminates the need for a post-cleaning rinse—simply remove parts from the tank and wipe or allow them to air dry for efficient, residue-free results.

## DIRECTIONS FOR USE :

Only for use in parts washing applications. In a parts washer, remove all the loose dirt and grime, spray the parts and then agitate by brushing. Then wipe or blow dry. For soak tank cleaning, simply immerse the parts to be cleaned, allow them to soak, then remove and wipe or blow dry. Current Issue® will not emulsify, therefore no need to rinse and no residue. Let it air dry or wipe dry with an absorbent cloth.

Please review label and SDS for all product directions, precautions, and first aid information.

## TECHNICAL DATA :

**APPEARANCE:** clear, light yellow liquid

**ODOR:** citrus

**WATER SOLUBILITY:** insoluble

**FLASH POINT:** >140°F

**DIELECTRIC STRENGTH:** 34,000 volts

**STABILITY:** Two years

### PACKAGING

25064	55 GL Drum
25065	20 GL Drum
125576	1 GL Bottle/CS4
