ICE MELT PALLET PROGRAM

PRODUCT OVERVIEW :

STOCK UP EARLY, SKIP THE SHORTAGES

Winter weather is unpredictable, but your ice melt supply doesn't have to be. State's Ice Melt Pallet Program lets you pre-order by the pallet for guaranteed mid-October delivery. Designed for high-traffic properties like office buildings, schools, healthcare facilities, and apartment complexes, the program ensures you have the supply you need without scrambling mid-winter. No sold-out suppliers, no last-minute runs to the store, and no disruptions when storms hit.

RELIABLE PERFORMANCE WHEN IT MATTERS MOST

You can't afford to have dangerous, icy sidewalks and walkways when visitors arrive at your facility. State's PolarPro™ Commercial Deicer is a high-quality blend of sodium chloride and magnesium chloride that works faster and at colder temperatures than traditional rock salt. It activates immediately upon contact to quickly melt ice and snow, even in sub-zero conditions. It also helps prevent refreezing, keeping walkways safe longer.

GENTLER ON PAWS, SAFER FOR PETS

While powerful on ice, our unique blend is formulated to be gentler on pets' paws than traditional rock salt alone. The inclusion of magnesium chloride helps reduce irritation, making it a safer choice for properties where pets may be present.

Note: No ice melt is completely risk-free. Always wipe your pets' paws after contact with treated areas to minimize irritation.

DIRECTIONS FOR USE :

Sprinkle a liberal quantity evenly over the surface to be cleared of ice and snow. Avoid pileups. Spread using a shovel, scoop, or spreader. For best results, apply as soon as snow begins falling to prevent its bonding to pavement. Re-apply to thawed areas to prevent refreezing as needed.

TECHNICAL DATA :

APPEARANCE: Blue crystals

STABILITY: Seal bags after opening to prevent moisture ingress

WORKING TEMPERATURE: -5°F

PACKAGING

129444-PAL

49 bags/pallet (50 lbs per bag)
