

VEHICLE SALT REMOVER

PRODUCT OVERVIEW :

Vehicle Salt Remover is specially formulated to remove embedded salt and corrosive salt residue from vehicles and equipment exposed to treated roads during winter weather. Its concentrated formula attacks salt deposits and converts them into a water-soluble form that can be easily rinsed away. This helps protect metal surfaces from rust and corrosion without harming painted or finished surfaces. Simply spray on, let it sit, and rinse clean.

DIRECTIONS FOR USE :

To remove heavy salt residues, dilute 6 oz of Vehicle Salt Remover per gallon of warm water. Spray or sponge solution onto equipment surfaces, allow to soak for 3 to 5 minutes before flushing with clean water. Once salt residue has been removed, wash equipment with a quality detergent.

TECHNICAL DATA :

APPEARANCE: clear, colorless liquid

pH (CONCENTRATE): < 2

DENSITY: approximately 8.6 lbs/gal

SHELF LIFE: two years

Please review label and SDS for all product directions, precautions, and first aid information.
